10.10 beta nacc: its the readmeys fault. you just saw that in the popup? netro: Why did you not upgrade? \*realname k1l\_: no, I saw you say "that did happen to you, maybe it's a bug in 16.04" and that was the first thing that came to my mind i don't have time and there were issues netro: You're the third person who was in here earlier claiming that an upgrade caused them to lose their swap. netro: Which is why I asked why you didn't upgrade in the first place, and why you don't have time. k1l\_: also, i know how to do that, but I can't help you with it, because I'm not running 16.04 and my live usb only has 8.04 on it netro: You also gave an incorrect time for when you asked to be given the iso's. so i went out and i downloaded it netro: so because it didnt work you didnt upgrade? ok wait i just did k1l\_: the only thing the HWE introduced was the new kernel, which you already know netro: please ask your issue again, all in one line. what is the package name for the window manager netro: see topic for

---

the desktop and that will get you back to 16.04. k11\_: hrm, I was wrong, you can also do hwe-oem and there was an i386 hwe-edge update :) netro: ubuntu-desktop nacc: yes. but you 82157476af
